

The Covid-19 pandemic has had a huge impact on nurses and nursing staff.

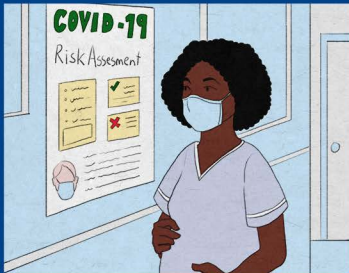

When they were needed, nursing students gave up their studies and retired nurses came back to work.

Nursing advice has been needed at the highest levels of government.

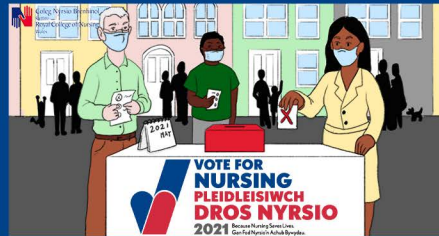

Nursing staff need access to PPE, testing and swift test results. Wales also needs more infection prevention nurses.

Risk assessments are needed to protect individual staff who may be at higher risk.

It's crucial for psychological support to be available to all nursing staff working through the pandemic.

Please support our call for a 12.5% pay rise for all nursing staff, and vote for candidates who support this in the Senedd elections in May 2021. Vote for nursing, because nursing saves lives.
